

# BELMONTE ELIAN

23 YEARS

DATA SCIENTIST

## PERSONAL PROFILE

As a Data Scientist and Software Engineer with two years of professional experience, I am currently engaged in a full-time role at Swiss AviationSoftware. Here, I have the privilege of contributing to groundbreaking **Data Science** and **Machine Learning** initiatives, including AI Predictive Maintenance and applications of Large Language Models.

I'm currently looking for **new challenges and opportunities** with a company that want to make data its major asset.

## SKILLS

- **Programming:** Python, SQL, Java, C, JS/TS, HTML/CSS, Solidity, Git, Docker
- **Data Science:** Pandas, Numpy, SKLearn, Tensorflow/Keras, PyTorch, OpenCV, PySpark, Matplotlib
- **Cloud:** Google Cloud & VertexAI, AWS
- **BI:** Tableau, PowerBI, Oracle BI
- **Back-end:** Flask, Django, Node.js
- **Front-end:** Flutter, ReactJS, Angular
- **Networking:** Cisco CCNA1 & CCNA2
- **Languages:** French native language, English proficient level, German basic level (learning)

Haut-Rhin, France

## WORK EXPERIENCE

### Swiss Aviation Software, Switzerland

**Data Scientist & Software Engineer - R&D department (08/2023 - Ongoing)**

- Develop predictive models & solutions for Aviation Business using Data Science & ML
- Implement deep learning with TensorFlow & PyTorch
- Deploy, manage, & scale ML models on GCP & VertexAI
- Develop Cloud-based RAG application using Large Language Models and Embedding models
- MLOps and Docker integration
- Full-Stack development in Python, Java & Flutter

**End-of-study project in Data Science - R&D department (02/2023 - 07/2023)**

- Time series forecast with LSTM, XGBoost, MLP...
- Model testing and cloud-based hyperparameter tuning
- Data extraction, analysis and feature engineering
- Development of APIs and Flutter apps for visualization

### Sonceboz SA, Switzerland

**Computer science internship within the I4.0 department (09/2021 - 02/2022)**

- AI and data analysis with Jupyter
- Refactoring of the MES web app (Angular & Ionic)
- Design of dashboards and data processing
- Creation of web applications and APIs REST
- AR/VR Sonceboz Logistic System project (Unity3D)

### Manor Food Basel St.Jakob, Switzerland

**Student commercial employee (2019-2021)**

### AMAC Aerospace Basel, Switzerland

**One-month worker internship (January 2019)**

## EDUCATION

**University of Technology of Belfort-Montbéliard**  
**Engineering degree in computer science (2023)**

Specialization in **Data Science & Computer Vision**  
**Bachelor (2021) & DEUTEC (2020)**

**Scheurer Kestner High school of Thann**

**Scientific High School diploma, High honor (2018)**

## ACTIVITIES AND INTERESTS

I practice running and indoor fitness. I also participate in Kaggle competitions to become a better Data Scientist. I really enjoy creating new things and keeping up to date with the latest technological innovations.
